

Abstract

The present invention is a method for fixing a fur on a pelting board (6) which is temporarily held in a pelting board holder (2), where the fur is put on the pelting board (6), where end parts of the fur are retained in a fur holder (3), and where the fur is stretched on the pelting board (6) to a desired length. Preferably the end part of the fur is fixed on the pelting board (6) by winding with a winding material (13), such as a band. The invention further is an apparatus (1) for securing a fur on a pelting board (6), where the apparatus (1) includes a pelting board holder (2), a fur holder (3) and a band winding unit (4), and where the band winding unit (4) is arranged for moving around the pelting board holder (2).
